

TimeKM™ Web (a rich intranet application) provides firms with the power of time tracking across multiple capture points either at the desktop or via the web using a single interface. TimeKM™ has been designed using the latest web technologies to deliver a better capture experience for timekeepers and at the same time reducing the overall cost of ownership for the firm.

Technical Requirements

- Microsoft Windows 2000/2003
- SQL 2000/2005
- I.E. Explorer 6.0 or higher

Integration

- Elite Enterprise / 3e
- Aderant Expert
- SAP R/3
- Other Financial Systems that support data feeds

Feature	Benefit
100% web interface by design, not adaptation.	Simplified implementation and support; no desktop PC touch or footprint resulting in lower cost of ownership.
Multiple capture opportunities offering choice for the timekeeper. <ul style="list-style-type: none"> ▪ Express Time (2 clicks) ▪ Classic Time Form ▪ TimeLine (Agenda style) ▪ Timer clocks 	Matching systems to actual timekeeper work habits increase participation creates buy in, resulting in faster and more accurate capture.
Dashboard Capture (1 click per entry).	Allows timekeeper to initiate capture by selecting from dynamic work list, reducing keystrokes and overall timekeeper effort.
In vision (always around).	Creates visual reflex for timekeeper to capture as he/she works resulting in more contemporaneous capture.
Collaboration Workspace.	A central hub for each timekeeper to which assistants have access to provide support to timekeepers, facilitating minimal effort in initial capture by timekeeper.
Multilingual interface and Matter language support.	Allows firm to capture and bill in the language of the client resulting in a better client relationship.
Case Shortcut mechanism.	Allow timekeepers to use corridor case names and bypass complicated client-matter numbers reducing effort in capture.
Customizable Workspace.	Provides flexibility allowing the timekeeper an optimal interface experience reducing effort in capture.
Graphical Performance Metrics.	Creates awareness for timekeeper in performance and state of time capture relative to targets.
Management Console.	Creates awareness for firm managers on the current state of time inventory including missing and not released time resulting in quicker delivery to billing state.

TimeKM™ was easily implemented, quickly appreciated and immediately impacted our bottom line. It doesn't get better than that.
